A series

FEATURES

- Super-light and super-thin in magnalium alloy material
- Large viewing angle
- High brightness
- Low power consumption
- Standardized cabinet 960x960, standardized module 320x160
- Standardization and serialization design, which saves storage costs and post-service costs
- Patented module design with dual power & data backup
- High degree of protection, front IP65, rear IP54

APOLLO series

- One size and variation: 240X480 module is the smallest display unit; You can make all kinds of products in different permutations, you can give them a + 4, you can get a + 4, you can get a + 1, and you can make it easy to get to the front and back;
- Rental application form, support special requirements such as arc, top mounted;
- Simple design: power supply, data input and output are combined. The input and output of the plug-in are combined. The overall connection is simple and neat, while the system and the link are fast;
- Platform design: different distances, different varieties all use the same material;
- Smart design: never to be wrong;
- General design; Meet standard input (power supply, data input with general form and product);
- A fully certified Certification program of the UL, the FCC, and CE, can implement - Excellent heat dissipation performance;
- Ultra high strength - bow design metal materials, adopt the die casting, machining form (inspiration) source of ancient Chinese stone arch Bridge;
- Super slim, the whole is less than 100mm;
- Super light , less than 25Kg/sqm;
- All-weather IP65, to meet any conditions under the use of outdoor, to reduce the additional cost;
- Fast maintenance: fast disassembly structure is adopted for both structure and wire;

FEATURE

- Smart Maintenance
- Simple design
- Front Maintenance
- Standard platform
- Free assembly
- Special Combination
- Fashion Appearance
- Various application
- Excellent performance
- Incurve and excurve assembly
- Rental
- Application: Ground screen and SKY screen

SYSTEM DIAGRAM

CVT320 is a Nova EO Converter device:

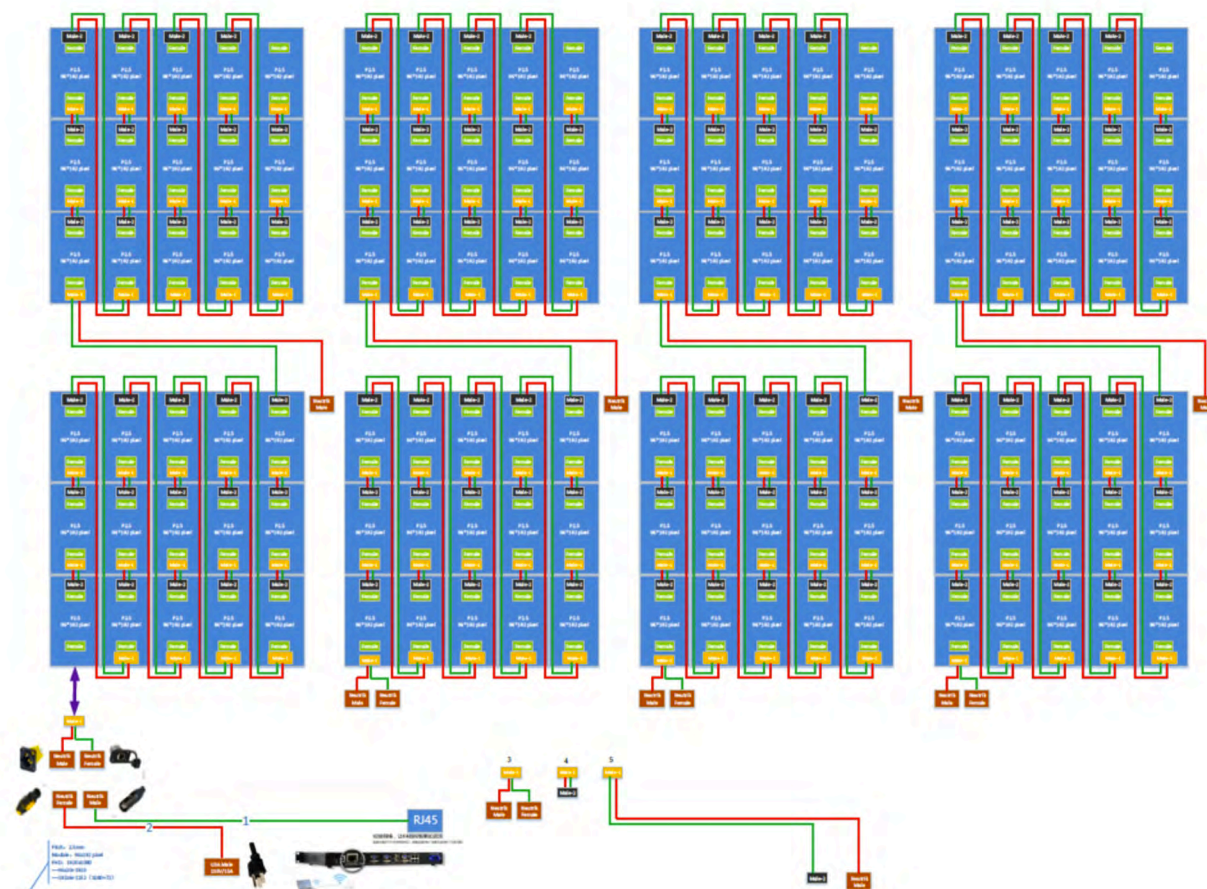

- a) 1 cable interface, 1 fiber interface
- b) 100-240V AC 50/60Hz power supply
- c) Use single mode dual core optical fiber with LC interface, the transmission distance is 15 Km
- d) No driver required immediately use after connection

- 1 DVI video input
- DVI video output for cascading or monitoring
- 1 Audio input
- 4 Ethernet port output or 4 fiber output
- RS232 control interface
- Maximum support resolution 2048x1152

STRUCTURE FEATURES

TVF series

STRUCTURE FEATURES

STRUCTURE FEATURES

INTELLIGENT MODULE

Intelligent module can store calibration data in-dependently,

Magnesium Alloy cover

INTELLIGENT CARD

32 group data, DDRII connector, plug and play

INTEGRATED DRIVER BOARD

No cable between module and driver board but connect with Pins, more reliable

INTERACTION LCD

Interactive LCD, convenient maintenance

MAGNESIUM ALLOY CABINET

High hardness, toughness, light weight, dimension precision, good EMC

EXPLODED VIEW

HIDDEN CONNECTOR

Hidden design, guarantee excellent contact between cabinets, neat and elegance look

HIGH POWER FACTOR PSU

Power factor $\geq 95\%$, constant current output, low harmonic interference

1080 Popular Resolution Configuration	4X4		5X5	6X6	8X8

TECHNOLOGY ADVANTAGES

PRECISION COLOR MANAGEMENT

Adopt accurate color management system, to apply pixel by pixel 12bit color calibration to each LED via Secondary Filtering Algorithm.

NON-LINEAR COLOR COORDINATE TRANSFORMATION COEFFICIENTS MATRIX

Using non-linear calibration curve and color coordinate transformation coefficients matrix, to realize the constant improvement of video effect. All indexes meet the opto-electronic standard.

COLOR/BRIGHTNESS PIXEL BY PIXEL CALIBRATION

Professional pixel by pixel color and brightness calibration but not whole screen calibration, and the most accurate and best effect can be guaranteed. Color uniformity (X, Y coordinate) < ± 0.003 (6500K white balance).

To calibrate discrete distribution LEDs of same beam and same batch, so as to make the LED screen video rendering the color from the nature world, and make it pleasing to human

COLOR GAMUT COVERAGE

The Panchromatic coverage of our fine pitch LED Video Wall can reach over 36%, can 100% meet the NTSC color range.

TVF series

TECHNOLOGY ADVANTAGES

POSITIVE 3D DISPLAY

- Positive 3D technology, excellent depth of field effect;
- Support 1080P high resolution display;
- Zigbee standard, provide optimal 3D visual experience;
- Support 2D/3D one button switch;
- Support multi 3D video source format ;
- Synchronous video play and 3D display.

INSTALLATION

TWF series

Smart HD Led Video Wall Panel

UNITECH
DIGITAL MEDIA

TWF series

Wall mounting video walls occupy less than 94mm of depth from the wall, front installation and front service;

Unique 6-axis alignment features ensure the video wall is perfectly aligned and seamless;

Unique structure and magnetic tools, makes the front maintenance possible;

Besides of normal flat installation mode, also support 90° corner installations and faceted curved video walls;

Adopt accurate power voltage control technology (common cathode drive) and Smart black field management

system, can save over 30% energy when compared with normal traditional LED display;

LED Panel pass Class A electromagnetic radiation standard, low radiation;

Adopt aluminum alloy to the structure and frame, stronger, lighter and better thermal conductivity;

Convenient 27" diagonal size and 16:9 aspect ratio LED Panel;

LED panel equipped with two HDMI Interfaces and Network control interfaces;

High accuracy: Both LED panel and installation bracket processed in the factory with high accuracy CNC technology.

10 bit broadcasting video processing technology, ensures perfect image quality.

TECHNOLOGY ADVANTAGES

TWF Series adopts accurate power voltage control technology (common cathode driver), according to the R, G, B features, encapsulate the LED IC power components in the same translation circuit, and implement accurate power voltage to the Driver IC, so as to lower the product power consumption.

Unique 6-axis step less adjustment design.

Adopts HDMI interface, no external LED controller needed, greatly increase the universality of the product.

Integrate the LED control into the PCB board, reduce the failure points, and good for reliability and easy for both production and maintenance.

Adopts leading processing technology for all key components, improve the assembling alignment.

Power redundancy and signal redundancy design, system reliability can be guaranteed.

Adopts aluminum alloy to the structure and frame, stronger.

Adopts smart black field performance management system, allocate power consumption intelligently, lower the whole panel power consumption.

Adopts accurate color management system, to apply pixel by pixel 12bit color calibration to each LED via Secondary Filtering Algorithm.

Using non-linear calibration curve and color coordinate transformation coefficients matrix, to realize the constant improvement of video effect. All indexes meet the opto-electronic standard.

Convenient 27" diagonal size and 16:9 aspect ratio panel design, help to lower the production cost and engineering cost. Increase the working efficiency.

Standardized frame design, convenient for on-site installation, shorter the time and increase the working efficiency.

TWF series

FEATURES

- Common cathode driving mode
- Real seamless assembling and easy connection
- High contrast ratio
- Wide color gamut
- Unique 6-axis step less adjustment structure
- Accurate color rendering uniform brightness
- Pixel by pixel brightness and color calibration technology
- Long lifespan
- User friendly brightness adjustment
- Broadcasting level grayscale processing
- Low power consumption, energy saving, environment friendly
- Nanosecond response time
- Less space required
- Super high refresh rate
- Low maintenance cost
- High reliable redundancy technology

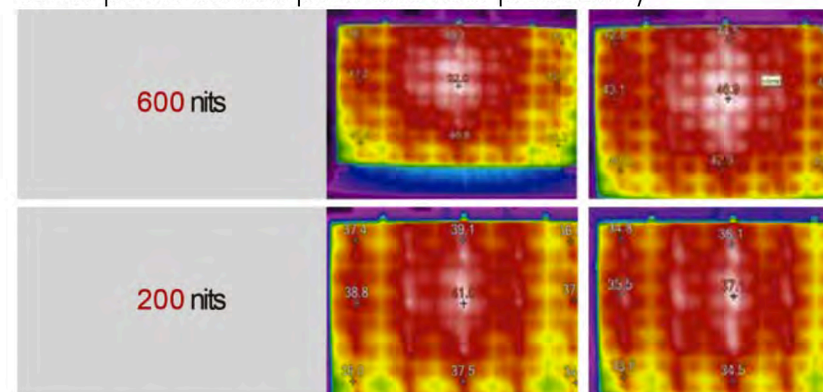

COMMON CATHODE DRIVING MODE

In common cathode driving mode, it can control the power voltage precisely, which can lower the power consumption, lower the heat productivity, minimize the damage to the LED and then prolong the LED lifespan.

Reduce color shift in the areas of low brightness; Evener grayscale gradation; Exquisite visual effect and high image fidelity.

Eliminate the light dots (so called "Ghosting" Effect) around the white words.

Lower power consumption and heat productivity

Exquisite Visual Effect

Color shift under conditions of low brightness, white balance Layered grayscale gradation Less color shift under conditions of low brightness and white balance Even grayscale gradation

Elimination of "Ghosting Effect"

Reduce the Failure LED Impact to the Display

TWF series

FRIENDLY BRIGHTNESS ADJUSTMENT

Equipped with external light sensor, the screen brightness can be auto-adjusted according to the ambient light, to be always in a suitable level.

HIGH CONTRAST RATIO

Adopts high quality black face LED lamp, increase the emitting brightness while lower the brightness of black frame. Black mask processing technology will also increase the contrast ratio.

BROADCASTING GRAYSCALE PROCESSING

Perfect grayscale performance in the area of low brightness. It can display more screen layering and color degrees when compared to previous products. No detail loss.

Normal LCD Video Wall in the Sun

LED Video Wall in the Sun

Contrast ratio of projected image 1000:1

Contrast ratio of LED image 5000:1

Blocks in shadows

Clear texture in shadows

IDEAL FOR SHORT DISTANCE VIEWING

Finer pixel pitch LED Screen is ideal for close viewing without screen grain sense.

IMAGE SHARPENING PROCESSING

Image sharpening is able to create the appearance of a more pronounced edge, and this effect makes the image seem clearer, seemingly adding details. This is an image processing technology based on Differential Algorithm.

Sharpening can make the image seem clearer, but it will add the noise as well.

TWF series

IMAGE ENHANCEMENT PROCESSING

It's a process of enhancing the visual quality of images due to non-ideal image acquisition process. It may cause distortion of the image.

To emphasize the image features in whole or in part according to the application.

To make the dim image brighter.

To make the subject stand out better .

To improve the interpretability or perception of information in images for human viewers.

IMAGE DENOISING PROCESSING

Under dark environment, sometimes it may have to enlarge the image, and then it will cause some unnecessary noise. It's necessary for the image processing system to remove noise from the image .

RAPID DYNAMIC DISPLAY

LED features Nanosecond response time, the interval between ON and OFF is extremely short. It could rapidly response without Visual Staying Phenomenon, very clear. It has big advantage for those applications requiring super good dynamic rendering effect.

The self emitting mode for LED needs no response time, no visual staying phenomenon happened even when people observe the rapid movement objects.

ADVANCED IMAGE PROCESSING TECHNOLOGY

Features: Strong video processing and calibration database arithmetic ability; High resolution video image output ability; Broadcasting video processing; 10bit grayscale processing; 16bit color processing which can display 281trillion colors; Self-adapting 50Hz or 60Hz video source; Frame by frame scanning; Enhanced image; Optimal image rendering ability, pixel by pixel rendering, sharp and clear. Realize image denoising and sharpening, color optimization, as well as color temperature adjustment.

TWF series

BRIGHTNESS & COLOR PIXEL BY PIXEL CALIBRATION

Professional pixel by pixel color and brightness calibration but not whole screen calibration, and the most accurate and best effect can be guaranteed. Color uniformity (X, Y coordinate) $< \pm 0.003$ (6500K white balance).

To calibrate discrete distribution LEDs of same beam and same batch, so as to make the LED screen video match PAL and NTSC format, truly rendering the color from the nature world, and make it pleasing to human eyes.

SUPER LONG LIFESPAN

Without considering of power and driver failure, the lifespan of LED reflects as its light decay. During working, the LED brightness will be lower and lower, until goes out. Normally, the standard lifespan of LED is defined according to 50% of the full brightness. The lifespan varies under different working temperature. The higher working temperature, the shorter lifespan. The typical lifespan of LED is 100,000 Hrs, which is much longer than traditional light source and bulb.

The lifespan won't be affected even under frequent On/Off usage.

TWF SERIES ENSURES EVERY PIXEL PITCH IS DESIGNED TO EXACTLY ACHIEVE FULL HD, 4K OR 8K RESOLUTIONS

TWF series

VARIOUS INTERFACES AVAILABLE

- Aluminum Alloy structure helps to shield the electromagnetic radiation, and have features of shock resistance, reliable and firm installation, lightweight, and so on;
- Accurate LED power supply system;
- Smart black field management system;
- Individual gamma adjustment design for each LED panel;
- Accurate color management system;
- Each card can drive up to 250,000 pixels, minimize the numbers of control card required, and lower the failure rate.

MR series

Ultra HD Led Video Wall

unitech
digitalmedia

MR series

FEATURES

MR1.8 is a fine pitch LED video wall display with a 1.8 millimeter pitch.

MR1.8 delivers benefits unique to its "flat panel" design including enhanced image quality, a 16:9 form factor optimized for the most popular high resolutions, ease of installation and service, and outstanding flatness and uniformity. With a power-efficient design, MR1.8 significantly reduces power utilization while delivering additional image optimization features.

SPECIFICATION

MR 1.8

Pixel Pitch	1,875 mm
LED Type	Commercial grade 3-in-1 Black SMD
Cabinet resolution	640 x 360
LEDs for cabinet	230,400
Pixel Density	284,444 / sq m 26,422 / sq ft
Cabinet size	1,200 x 675 x 100mm 47.24 x 26.57 x 3.94in
Cabinet diagonal	1,377mm 54.21in
Cabinet area	0.81 sq m 8.718 sq ft
Modules cabinet	5 x 4
Module resolution	128 x 90
LEDs for module	11,520
Module size	240 x 168.75mm 9.44 x 6.64in
Power consumption max	440 / Cabinet 543 / sq m
Power consumption typical	132 / Cabinet 162 / sq m
Voltage	100-240V AC, 50/60Hz autoranging
Cabinet weight	30 kg 66.1 lb
Weight/mq	37 kg / sq m 81.6 lbs / sq m
Brightness max	800
Contrast ratio	> 6,000:1
Brightness Uniformity	>97%
Color Uniformity	>97%
Color Gamut	100% NTSC
LED Refresh Rate	5100 Hz

MR series

SPECIFICATION

MR 1.8

Color Temperature, Adjustable (k)	3,200 - 9,300
Viewing Angle, Horizontal	160°
Viewing Angle, Vertical	140°
Video Inputs	2x HDMI in, 2x HDMI out; HDCP Compliant
Video Input Resolution Maximum	1920 x 1080 @ 60Hz
Frame Rate	50, 60Hz
Control Input Type	RS232 or Ethernet
Gray Scale Processing	16-bit
Service Access	Rear
LED Lifetime: Typical	100,000 hrs
Environment	Indoor
Power Supply	Single. Dual optional
Protection	IP30
Acoustic Noise	Fanless Operation
Operating Temperature/Humidity (degrees F/C) 10-80% relative humidity, noncondensing	-10° to 40° C -14° to 104° F
Storage Temperature/Humidity (degrees F/C) 10-85% relative humidity, noncondensing	-20° to 60° C -4° to 140° F
Regulatory Compliance	NRTL UL 60950-1, FCC Class A, CE EN60950-1, EN 55032 Class A and EN 55024, WEEE, CISPR 32/2015

FEATURES

The Unitech MR Series is a line of fine pitch LED video walls available in 1.2, 1.8 and 2.5 millimeters pitches. The Unitech MR Series is architected to support the highest pixel density and deliver benefits unique to its "flat panel" design including a 16:9 form factor optimized for the most popular high resolution standards, ease of installation and service, and outstanding flatness and uniformity.

MR series

SPECIFICATION

MR 2.5

Pixel Pitch	2,5 mm
LED Type	3-in-1 Black SMD
Cabinet resolution	480x270
LEDs for cabinet	129,600
Pixel Density	14,862 per sq. foot (160,000 per sq. meter)
LED Type	1,200 x 675 x 100mm 47.24 x 26.57 x 3.94in
Pixel Configuration	SMD 3-in-1 (1R1G1B)
LED Configuration	1 Red, 1 Green, 1 Blue
Brightness, Uncalibrated, Calibrated	NA, 600 nits
Brightness, Uniformity	97%
Viewing Angle, Horizontal	160°
Viewing Angle, Vertical	140°
Color Space	92% NTSC
Color Uniformity	97%
Color Temperature, Adjustable (k)	3,000-10,000
Contrast Ratio	6,000:1
Frame Rate	50, 60 Hz
LED Refresh Rate	5,100 Hz
Power Consumption, Maximum (watts)	470/cabinet, 580 per sq. meter
Power Consumption, Typical (watts)	160/cabinet, 200 per sq. meter

SPECIFICATION

MR 2.5

Runtime Duty Cycle	24x7
LED Lifetime	50,000 hours
Acoustic Noise	Fanless Operation
Operating Temperature/Humidity (degrees F/C, relative humidity)	+14° to +104°F (-10° to +40°C) at 10-80% RH
Storage Temperature/Humidity (degrees F/C, relative humidity)	-4° to 140°F (-20° to +60°C) at 10-85% RH
LED Cabinet Size (W x H xD)	47.24" x 26.57" x 3.94" (1,200 mm x 675 mm x 99 mm) (cabinet only, not including mount)
LED Cabinet Diagonal	54.21" (1,377 mm)
LED Cabinet area	8.72 sq. feet (0.81 sq. meters)
LED Cabinet Weight	24.5 per cabinet, 30.3 per sq. meter
Warranty	2 year limited warranty
Adjustable Mount	Optional
Environment	Indoor
Redundancy	Optional dual power supply, optional redundant video cabling
Line Voltage	100-240 Volts AC, 50 & 60Hz
Video Input Type	HDMI
Video Input Resolution Maximum	1920x1080 @ 50, 60 Hz
Display Control	Unitech® Control Software included
Control Input Type	RS232 or Ethernet
LED Surround	Black

Note:

ML series

Small Pixel Pitch LED Display

ML series

FEATURES

- Top-level seamless HD video wall.
- No grainy effect even at a close look.
- A perfect substitute of traditional DLP, LCD and projector.
- Brand-new display terminal far conference room, commanding center, control center and surveillance center.
- Using 4 in 1 Mini LED, highly integrated, anti-collision, anti-moisture.
- 16:9 golden ratio for cabinet, easily splice for 1080P & 4K big screen.
- Supporting tiny gap adjustment & seamless splicing.
- Cabinet has 6.5kg, 60mm thickness, support 100% front maintenance, easily maintain.
- Electric circuit use HCC Technology high brightness with low electronic consumption.

Golden ratio 16:9

support 1080p, 4k led display

20*20 (Cabinet)

10*10 (Cabinet)

5*5 (Cabinet)

609 x 343 mm

55(Feet)

Wireless connection

Using Harting aviation head, no connection line between each cabinet.

ML series

Silent Operation

Communication-level external DC power supply and fanless design contribute to noise-free effect.

Turns slim as silk

cabinet weight 6.5 Kg

cabinet thickness 60 mm

The core advantages

- Ultra-high refresh technology, support up to 18 bit gray scale.
- No screw needed, take the back cover off within 10 seconds to change the power supply and receiving card.
- Double power supply system, keep from black screen due to single power failure, safe and stable.

Completely front maintenance

Completely rear maintenance

Double power supply

ML series

Fine Turning function

The gaps between modules are adjustable, to realize true gap free.

Before fine adjustment

After fine adjustment

Mini-LED

refers to LEDs with a size of about 100 micrometers, with IMD Integration Packaging, this technology makes narrow pixel pitch LED display has the advantages of anti crash, dust proof, also less graininess, less artefacts.

Fine display effect

NTSC broadcasting-level color gamut and adjustable Intelligent color temperature.

The adjustable range is from 2500-10000K which could satisfy the need of various application especially for TV studio.

ML series

LCD

ML series

Super wide viewing angle

Super wide horizontal and vertical viewing angle covers more potential customers.

Fine display effect

Fine-tuned structure to ensure better flatness.

ML splicing (No seam no frame)

DLP splicing (seam no frame)

LCD splicing (seam&frame)

No black screen during use

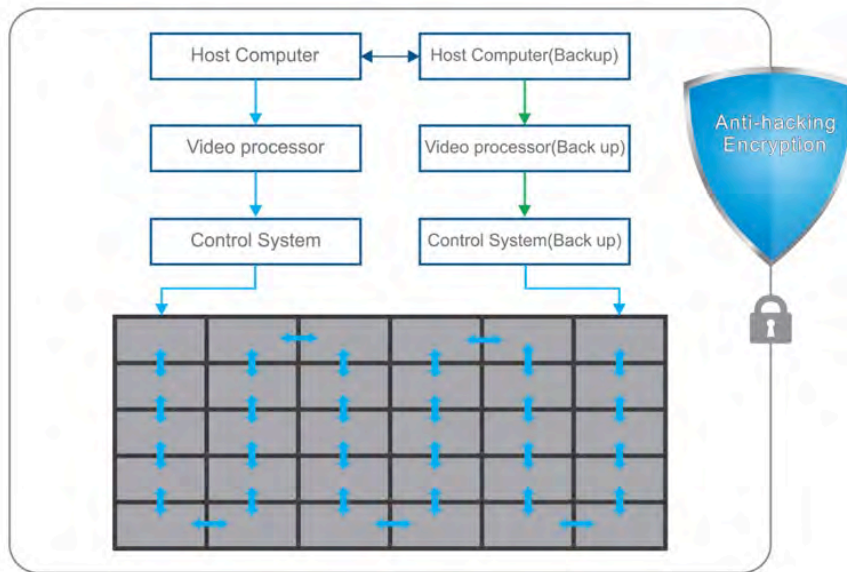

Double power supply system: N+1 backup mode could guarantee no black screen during use and narrow down the fault rate to 1/300000, which is safe and reliable.

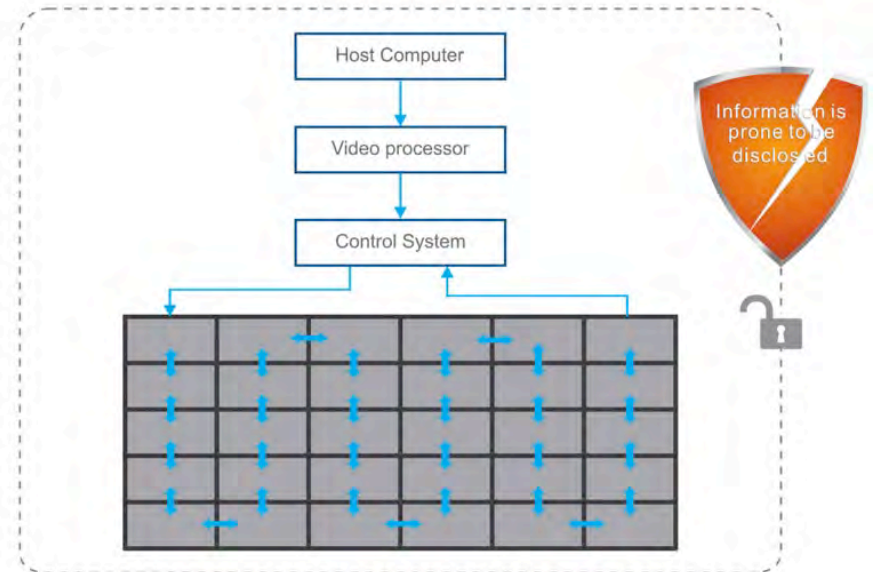

ML series

Hot double backup for signal

- The integrity of input signal is detected automatically and continuously. Once the failure is found, the fallover would guarantee stable and reliable broadcasting.
- Unitech high-end control system supports for encrypted output to avoid malicious signal cut-off and input.

Signal System of ML Series

Signal System of Traditional Screen

Maintenance

Both received card, distribution board, and power supply are support front maintenance. It reduces the difficulty of product maintenance and solves the worries of customers.

Mirror Digital Poster Frame

unitech
digitalmedia

Mirror

With Mirror it's possible watching or screening video, audio or pictures playlist anytime anywhere.

With Mirror it's possible update digital content in powerful built-in media player by WIFI or USB: easy to follow on screen menu makes it absolutely simple to schedule content and no complicated configuration is needed.

With Mirror it's possible do servicing and panel replacements from the front just with a magnetic handle fast and conveniently.

Mirror is crafted in anodized aluminium, it is lightweight yet durable: the entire poster frame weigh less than 35Kg, making it more portable and easier to install.

FEATURES

- Immersive visual experience: 2.5mm pixel pitch display
- Ultraslim, lightweight and installation-friendly: crafted in anodized aluminium, it is lightweight yet durable
- Zero configuration: plug in play media player
- Front serviceability: hot swappable front access module and cabless connection
- Easy control :high refresh rate and 128 steps of gradation control no pc required
- Intelligent content monitoring and management: per-integrated software enables connect with a pc or android devices from a single location via RJ45 WIFI 3g USB and HDMI
- Easy future upgrade to smaller pixel pitch
- Wall mounting options: easy and secure way to affix to the wall with the wall mountable brackets with built in levels
- Floor standing: sturdy support plus the discreet tuck away neatly incorporated into the groove when not used

Display colour	4.4 trillion
Drive mode	1/28 constant scan
Processing depth	12 bits
Contrast ration	3000:1
Operating lifetime (50% Brightness)	> 100.000 hours

ENVIROMENTAL

Operating temperature	-10°~+50°C
IP rating front/rear	IP20

CABLE

Power cable	length 2000mm
HDMI cable	length 2000mm
RJ45 cable	length 2000mm

RIGGING

Rigging possibilities	suspended with rigging bar or floor mounted
Wall mounted bracket horizontal	150x42,25x53mm
Wall mounted bracket vertical	340x35,50x548,50mm
Fold-out stand	sturdy support plus the discreet tuck away incorporated into the groove when not used
Floor Stand straight	weight 31,18 Kg
Floor Stand tilt	fixed 5° tilt angle weight 21,28 Kg

CONTROL

Display mode	Asynchronous/Synchronous system
Signal inputs	Stand alone mode MT mode Mirroring mode Extenden mode Wireless multi-screen mode
Signal output	HDMI
Connection type	Ethernet/Wifi
Supported VGA mode	224x756
Supported video files	MPEG/H.264

POWER

Input voltage	100-240VAC 50-60Hz (auto-sensing)
Avg. power consumption	240W/panel
Max power consumption	600 W/panel

STAND-ALONE MODE

Update digital content in built-in media player via Wi-Fi or USB. The built-in storage capacity of 5GB supports almost all video and image formats. There are also HDMI input and output that allow external computer synchronization using third-party media player software.

MT MODE

Connect poster to Android tablet or smart phone via Wi-Fi. The customize APP can identify and manage basic setting of poster like "adjust brightness, on/off, upload the play list, change network setting.

MIRRORING MODE

Show the contents of one poster on the screen of another poster simultaneously.

WIRELESSMULTI-SCREEN MODE

Link maximum three poster together and stay connected via a router.

EXTENDED MODE

Split and show the same video content on two or more posters simultaneously. Also known as cascade or split screen mode.

Note:

HOLO 3D Display

unitech
digitalmedia

HOLO 3D Display

HOLO 3D DISPLAY is a revolutionary media solution for creating, managing and displaying 3D video content with holographic effect.

It is a unique combination of a hi-tech projection unit and a proprietary management platform that allows to upload content wirelessly and manage all devices remotely from a single location.

HD VISUALS

Incredibly realistic 3D visuals with unparalleled HD quality and stunning holographic effect

CONVENIENCE

All content can be uploaded and updated wirelessly from a single location

HIGH QUALITY

Devices are made with meticulous care from top quality materials

WARRANTY

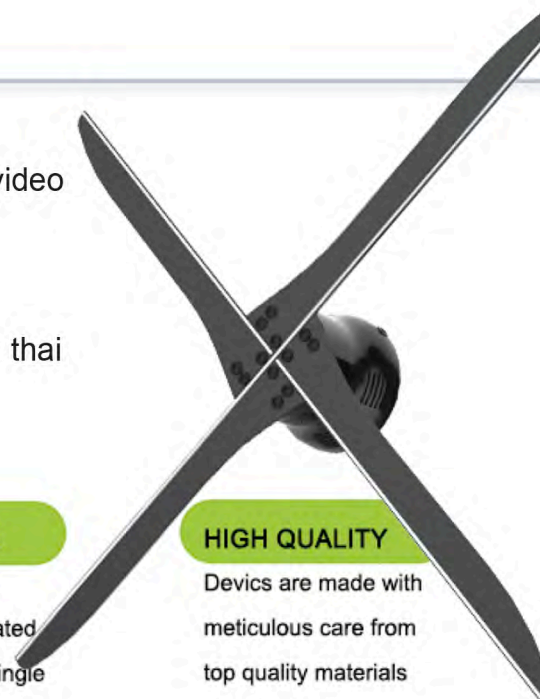

Units have a 12-month manufacturer warranty and can operate up to 3 years

24/7

Units are designed to work round the clock whenever you need it

PORTABLE

Units weigh only 0.8 kg, which makes them easy to mount and relocate

Snake series Strip Led

unitech
digitalmedia

Snake series

FEATURES

- Professional structure design
- Uniform illumination, no light spot,
- Soft light, consistent color temperature
- The use of silicone material, anti-yellowing, high temperature resistance, can be used in harsh outdoor weather
- Anti-corrosion, acid, etc., can be used under extreme conditions
- Waterproof performance
- Good flexibility, good bending
- Easy modelling, stretching resistance

CUTTING METHOD

Cut at the black dot on the side of the neon lights.

INSTALLATION METHOD: TAIL PLUG

Apply glue to the end of the casing. Install the plug in the direction of the arrow

After installing the plug, quiet to place for 25 to 30 minutes.
Let the glue dry completely.

INSTALLATION METHOD: CLIPS

Have screws and clips ready.

Adjust the clips to the appropriate position, use screw in the screwdriver and fix it.

Put the light body upwards, gently apply force, embedding the neon light into the clips

Snake series

CORRECT BENDING

When installing the Snake light, please note that not all directions can be bent, the shape, size and direction of the bend, please follow the legend below to avoid damaging it.

WRONG BENDING

For the side of the Snake light (as shown), please do not bend the light bar downwards to avoid damaging it.

For the side of the Snake light (as shown), please do not bend the strip light upwards to avoid damaging it.

NET series

No more limits to your fantasy with the brand new Unitech's **NET series** video panels!

The last generation **NET series** led displays are very versatile products, usable for great installations and captivating sceneries too. **NET series** led displays allow you to create fantastic lighting sceneries without any problems thanks to their light weight. **NET series** is composed by different models so that you can find the most suitable to your needs. Furthermore the size can be customized:

- **NET 3** with 37.5 mm pixel pitch is a flexible screen display for rental and staging, ultra light, super transparent, very easy curved.

- NET 5 with 56.25 mm pixel pitch is a transparent led display screen for rental and staging, ultra light, super transparent.

- NET 3 HD is a curved led display ultra light, super transparent, easy to install.

NET series

- NET 5 HD is a soft led screen ultra light, super transparent, easy to install.

- NET 7 HD is an indoor and outdoor LED curtain screen, ultra light, super transparent, easy to install.

NET 3

- Ultra flexible design make it can be curved freely to achieve creative shapes like arch, circle, wave, customized size available.
- 70% transparency rate, easy for stage light, fog, lasers go through the screen to create superb visual effect.
- Fast inter-panel locks make it quick and easy to set up and dismantle large-scaled screen, no tools required.
- Quick hanging up by using the following two pieces of connector.
- LED strips can be taken out to satisfy various creative ideas.
- Head and tail of the panel, with waterproof connectors.

NET series

NET 5

- Ultra flexible design make it can be curved freely to achieve creative shapes like arch, circle, wave, customized size available.
- 81% transparency rate, easy for stage light, fog, lasers go through the screen to create superb visual effect.
- Fast inter-panel locks make it quick and easy to set up and dismantle large-scaled screen, no tools required.
- Quick hanging up by using the following two pieces of connector.
- LED strips can be taken out to satisfy various creative ideas.
- Head and tail of the panel, with waterproof connectors.

NET 3HD

- Ultra flexible, easy to form a flat screen or curved to match with irregular shaped building facade, both pixel pitch, panel size and panel color can be customized.
- High transparency maximizes the natural light get inside of the building, also ensuring the screen has great ventilation and wind-resistance function.
- Fast inter-panel locks make installation quick and easy especially for a large-sized screen.
- Ultra light, a simple installation structure is enough to hold the screen. Panels can be well fixed by locking the following two pieces of connector on installation structure.
- Both single LED strips and LED dot can be taken out for repair or replacement, which make service much more convenient.
- Head and tail of the panel with waterproof connectors.

NET series

NET 5 HD

- Ultra flexible, easy to form a flat screen or curved to match with irregular shaped building facade, both pixel pitch, panel size and panel color can be customized.
- High transparency maximizes the natural light get inside of the building, also ensuring the screen has great ventilation and wind-resistance function.
- Fast inter-panel locks make installation quick and easy especially for a large-sized screen.

T series Led Display

unitech
digitalmedia

T series

T Series of Unitech Digital Media is glass Led Display that offers excellent high definition video solution for glass architecture advertisement.

Thanks to a 3mm pixel pitch and 80% transparency, **T Series** panels make the vivid video effect without affecting the natural light in the building. Everything is under control. You can easily hang them on the truss or from ceiling, or stack them on the floor. The whole system is user-friendly thanks to auto-brightness adjustment and a very easy maintenance (within 3 minutes).

Unitech **T Series** is ultra transparent, ultra light and very slim, suitable for outdoor and indoor use thanks to an high brightness from 3000 to 6000 nits. High resolution provides exceptional display performance and perfect embodiment of Ultra HD Led technology. Then it is energy-saving and free of cooling system and air-conditioner

FEATURES

- >80% transparency for amazing "see-through" effect.
- Ultra light and slim: weight is only 6 kg/mq and 32mm thickness.
- Brightness is optional from 3000 to 6000 nits, suitable for outdoor and indoor use.
- Ultra HD Image
- Pitch size and module size are customized.
- Easy installation and set up. Integrated with power, receiving card, easy and fast installation(< 10 min. to install)
- Maintenance within 3 minutes.

T10.1 series

FEATURES

- Screen only weighs 20 Kg/mq
Installment efficiency is doubled because of the light body of the screen
- Transparency rate can reach 65%
High transparency leads to a good lighting effect
- The thickness of the screen is 18mm
Ultra-thin design makes the screen blend into the building perfectly
- Average rated power: 100W/mq
The screen is over 50% less power-consuming than traditional screen

HANDINESS

Screen only weighs 20 Kg/mq:
Installment efficiency is doubled
because of the light body of the
screen

DIAPHANOUSNESS

Transparency rate can reach 65%:
High transparency leads to a good lighting effect

THINNESS

The thickness of the screen is 18mm:
Ultra-thin design makes the screen
blend into the building perfectly

EFFICIENTIBILITY

Average rated power 100W/mq:
The screen is over 50% less power-consuming
than traditional screen

C Installation series

C31i

C31i is the best you can find in terms of lightness and minimal structure. Screen body is thick 70mm only, screen and holding structure weight less than 18 kg/mq. Its transparent design allows you to create all fantastic effects you wish.

C31i is waterproof and windproof. Some properties: 70% transparent rate ventilated and transparent, air convection design, heat dissipation quickly; high integrated design, 50% power saving than the traditional screen. C31i doesn't need external AC, as integrated in the box, so saving cost.

It's very easy to install, to hoist and to replace, also thanks to small size and lightness.

C31i can be used in city landscape modeling, building walls, huge stage background, bridge rivers and dams landscape.

ELF
RGB DIP3IN1

C31i

FEATURES

- Waterproof and windproof.
- Screen body thickness 70 mm.
- Screen and holding structure <20 kg/mq.
- Transparent rate >45%.
- Arc assembly: ergonomics design, quick lock up; adjustable gap, ensure full screen seamless; support rapid installation and disassembling, saving time and effort.
- Signal lights: power and signal integration transmission cable; built-in power supply and receiving card; red signal lights, integrated work lights and test button.

C15i LED DISPLAY

SIZE: 59.09"x9.84" (1500x250mm)

WEIGHT: 34.8 lb (15.8 kg)

P31i

P31i is the best you can find in terms of lightness and minimal structure. Its transparent design allows you to create all fantastic effects you wish.

P31i is waterproof and windproof. Some properties: DC24V Input, to make long distance power support; 70% transparent rate, ventilated and transparent, air convection design, heat dissipation quickly; high integrated design, 50% power saving than the traditional screen. **P31i** doesn't need external AC, as integrated in the box, so saving cost.

Thanks to front service installation it needs 60% space less for maintenance. **P31i** has a tough strong clip fixtures for installation, so it doesn't need iron structure.

P31i can be used in city landscape modeling, building walls, huge stage background, bridge rivers and dams landscape.

ELF
RGB DIP3IN1

P31i

FEATURES

- DC24V power input, perform long distance data transfer.
- High purity aircraft aluminum back housing, heat dissipation size small, weight light.
- Integrated completely sealed glue design, make proof levels the top stability.
- Structure light, easy for delivery and installation, almost free iron structure in need.
- Front services installation, 60% space less for maintenance.
